PRODUCT MANAGER

Healthcare Platforms • Interoperability • Clinical Workflows • AI-enabled Products

Product Manager with 4+ years leading strategy, discovery, and delivery of healthcare platform products that improve clinician experiences and modernize care delivery. Experienced building business cases, securing executive investment, defining multi-year product roadmaps, and partnering with clinicians, engineering, design, and executive leadership to deliver scalable healthcare solutions. Proven track record launching products that reduce administrative burden, improve adoption, and enable healthcare interoperability across provider ecosystems.

EXPERIENCE

Product Manager — Provider & Clinician Experience | WorkSafeBC Apr 2024 – Present

Selected Impact

- Reduced clinician submission workflow from **11 steps to 5**, increasing digital adoption to **60% within six months** while generating approximately **\$200K annual operational savings**.
- Built executive business cases that secured over **\$1.23M** in funding across strategic healthcare initiatives, including:
 - **\$500K** for modernizing provider invoicing
 - **\$650K** for provider identity modernization
 - **\$80K** for healthcare interoperability and API integrations
- Led migration of **5,600 healthcare providers across 500 organizations** to a modern identity platform with **0% downtime, 85% pre-deadline migration**, and **92% post-launch login success**.
- Established product analytics using PostHog to measure adoption, funnel performance, and user behavior, driving continuous product improvements.

Product Strategy & Customer Discovery

- Defined product strategy and multi-year roadmap for clinician-facing products supporting treatment requests, referrals, claims, provider onboarding and invoicing.
- Conducted qualitative interviews, workflow observations, usability testing, and journey mapping with clinicians to validate product opportunities, identify unmet needs, and prioritize roadmap investments.
- Partnered closely with Engineering, Design, Clinical Operations, Enterprise Architecture, Marketing, and executive leadership throughout product discovery and delivery.

Healthcare Platform & Interoperability

- Defined product strategy for a healthcare interoperability platform connecting provider EMRs with WorkSafeBC through API integrations, reducing duplicate documentation while establishing a scalable roadmap covering approximately 70% of the provincial provider ecosystem.
- Built the executive business case securing **\$80K** in funding for API-enabled integrations with major EMR vendors covering approximately **70% of British Columbia's provider ecosystem**.
- Evaluated integration strategies, provider workflows, interoperability constraints, and platform tradeoffs to prioritize scalable product investments.

Clinical Workflow Platform

- Led redesign of clinician documentation and invoicing workflows using customer research, analytics, and usability testing.
- Improved data quality through front-end validation and workflow simplification, reducing support calls by **30%** while increasing clinician satisfaction (**NPS +25**).
- Partnered with engineering throughout iterative delivery, backlog prioritization, sprint planning, and product validation.

Identity Platform Modernization

- Led product strategy for replacing a legacy government identity platform with a modern CIAM solution supporting secure access for healthcare providers.
- Built the executive business case securing **\$650K** to modernize provider authentication while reducing operational risk and improving provider access.
- Coordinated Engineering, Operations, Communications, Security, and external vendors through rollout, adoption, and change management.

AI-enabled Clinical Operations

- Led development of Referral Radar, an AI-assisted clinical decision support product helping case managers identify appropriate healthcare referrals earlier in the recovery journey, demonstrating approximately **\$20M** in potential claim cost reduction.
- Accelerated product discovery using AI-assisted prototyping tools including GitHub Copilot and Lovable, reducing concept-to-validation timelines by approximately **40%**.

Product Manager | Technical Safety BC Oct 2021 – Apr 2024

- Led product discovery for mobile workflow products through customer interviews, usability testing, rapid prototyping, experimentation, and iterative product development.
- Defined product vision, roadmaps, PRFAQs, user stories, and usability testing strategy for digital inspection platforms before engineering investment.
- Partnered with engineering, design, operations, research, communications, and executive leadership to deliver customer-centered products.
- Built NLP-powered workflow automation to classify and route operational requests, reducing manual effort and improving response times.
- Developed predictive analytics products identifying 11.7% annual churn, enabling leadership to prioritize customer retention strategies.
- Designed an RFM segmentation model that retained 78% of high-risk customers through targeted engagement.

Strategy Consultant | 180 Degrees Consulting — University of British Columbia Sep 2020 – Oct 2021

- Developed product and market strategies for nonprofit and clean energy organizations through customer research, market analysis, and strategic planning.
- Designed a data-driven acquisition strategy for Open Primaries that reduced website bounce rate by 37% while doubling subscriptions.

SEO Consultant | Convertus May 2018 – Jul 2019

- Developed growth strategies for **75+ clients**, increasing organic acquisition by approximately **150%**.
- Built forecasting models predicting SEO performance with approximately **85% accuracy**.
